WORK EXPERIENCE

Freelance development on "Fiverr"
front-end developer,
Mar 2023 - Now

It is hard to find the job because of war, so that's why I mostly working on some website developing projects on freelance. I already completed front-end tasks for two websites and one web-app.
I am not including this time in my total work experience, but want to say that I keep learning and improving my skills. And of course I am still looking for a job where I can improve myself further and work with a team.

Sprakkraft - Brainglass, Sweden (Remote)
front-end developer, app designer
Apr 2021 - Feb 2023

It was a Swedish product company where I worked remotely as a frontend developer and also simultaneously as a designer of the new features for the projects we were working on. Also I then integrated those features into our products.
In addition to that, I was responsible for maintenance of websites: sprakkraft.se, sprakkraft.org.
And we had outsource contracts with "UR Play"and "YLE", where my role was mostly maintenance of their websites and adding new features to websites and video players.

HTML/CSS/JS
SCSS/SASS/
styled-components
REACT.JS
Redux,
Next.js,
TYPESCRIPT
NODE.JS

FIGMA/
Photoshop/Illustrator

Jet-up, Khmelnitskiy
junior react-developer

Sep 2020 – Dec 2021

I started my career path here - in a local company, but
I wasn't there for a long time because of Covid
pandemic and the traffic crisis that appeared because
of that. Company demanded from us to come to the
office anyway, and forbade working remotely.

Upwork, freelance
2d artist, web-designer, web-developer

Aug 2017 – Jan 2020

Long time I was working as a freelancer. I started as an
artist for pixel-art games and web-designer. But later I
learned html/css and started to take projects for
developing templates and simple landing web-pages.

I also had other places of work, but they are not relative
to my IT career.

EDUCATION

Udemy, Coursera - full-stack web development

May 2020 – Oct 2020

I got most of my IT-education online, on different courses.
My higher education is not related to web-development.
